Select higher settings for faster audio copying. Select lower settings to correct buffer underrun problems.					
Defaults					
OK Cancel Apply Help					

Tools/Options - The General and Advanced tabs are shown above.

The General tab lets you setup startup options and errorlog file.

The Advanced tab lets you use troubleshooting tools to solve audio recording problems.

Tools/System Tests - three tests can run

- 1. Transfer rate Tests speed at which data can transfer from a specified source.
- 2. Audio Extraction Tests speed at which a CD can extract audio.
- 3. Recorder Tests speed that a recorder can record at.
